Luminous, Smooth, Supple Skin

Harnessing the power of glutathione, RadianiX® rejuvenates the skin, enhancing its luminosity, smoothness, and suppleness. Glutathione is a potent antioxidant that combats daily environmental stressors and UV radiation which contribute to photoaging. It inhibits dark melanin production, resulting in skin that appears brighter and more radiant. By protecting the skin from the inside out, RadianiX® promotes a more even-toned complexion and youthful looking skin.

In addition, as a master detoxifier, glutathione neutralises harmful free radicals, reduces oxidative stress and prevents cellular damage, strengthening the body's immunity for better overall health.

Enhanced Absorption with WaferiX® Technology

At the core of RadianiX® is the patented WaferiX® technology, featuring a novel wafer matrix that is highly porous, amorphous, and non-ionic. When the wafer is placed under your tongue, it dissolves quickly, allowing glutathione to be absorbed through the mucosal membrane and directly into the bloodstream, bypassing the digestive system.

As a result, the bioavailability of glutathione is enhanced, leading to visibly brighter and more youthful skin, faster.

Increase in Skin Lightness, Elasticity and Smoothness in 100% of Participants*

Clinically shown to:

INCREASE IN
SKIN ELASTICITY
UP TO **226%**

INCREASE IN
SKIN LUMINOSITY
& GLOSS
UP TO **60%**

INCREASE IN
SKIN SMOOTHNESS
UP TO **71%**

REDUCE EYE
WRINKLES &
FINE LINES
UP TO **51%**

*Results within 8 weeks based on a clinical trial of 34 female participants with signs of skin ageing, evaluated objectively using skin measurement instruments. Results may vary.
